The Status of Women in Arizona, 2015: Highlights

Women in Arizona have made considerable advances in recent years but still face inequities that often prevent them from reaching their full potential. Since the 2004 *Status of Women in the States* report was published, the gender wage gap in Arizona has narrowed, a higher percentage of women have bachelor's degrees, and women are more likely to work in managerial or professional occupations. Yet, as in all other states, women in Arizona are less likely than men to be in the labor force and more likely to live in poverty. Women also continue to be underrepresented in the state legislature.

If current trends continue, women in Arizona will not see equal pay until the year **2044**.*

Women hold **35.6%** of seats in the state legislature.

Key Findings

- Arizona's best grade is in the area of reproductive rights, for which it receives a C+. Its worst grade is in work and family, for which it gets a D.
- Arizona women who work full-time, year-round earn 82 cents on the dollar compared with similarly employed men.
- Approximately 27.1 percent of those working in science, technology, engineering, and mathematics (STEM) fields in Arizona are women, compared with 28.8 percent nationwide.
- As of 2015, there are no women of color in statewide elective executive office in Arizona, and no women of color from the state in the U.S. Congress.
- Women in Arizona who are unionized earn \$176 more per week, on average, than those who are not represented by a union.
- Approximately 26.8 percent of women in Arizona have a bachelor's degree or higher, an increase of about 5 percentage points since 2000.
- In 2012–2013, 19.0 percent of Arizona's four-year-olds were enrolled in state pre-K, preschool special education, or state and federal Head Start.
- Heart disease is the biggest killer of women in the United States. Arizona ranks 8 of 51 with a mortality rate of 112.6 per 100,000.

About the Status of Women in the States

The Status of Women in the States is an ongoing research project conducted by the Institute for Women’s Policy Research (IWPR) to measure and track the status of women in all 50 states and the District of Columbia. IWPR appreciates the support of the Ford Foundation, the American Federation of Teachers, and the Women’s Funding Network for the production of this fact sheet.

The Institute for Women’s Policy Research (IWPR) conducts rigorous research and disseminates its findings to address the needs of women, promote public dialogue, and strengthen families, communities, and societies. The Institute’s research strives to give voice to the needs of

women from diverse ethnic and racial backgrounds across the income spectrum and to ensure that their perspectives enter the public debate on ending discrimination and inequality, improving opportunity, and increasing economic security for women and families. The Institute works with policymakers, scholars, and public interest groups to design, execute, and disseminate research and to build a diverse network of individuals and organizations that conduct and use women-oriented policy research. IWPR’s work is supported by foundation grants, government grants and contracts, donations from individuals, and contributions from organizations and corporations. IWPR is a 501(c)(3) tax-exempt organization that also works in affiliation with the women’s studies and public policy and public administration programs at The George Washington University.
