The Status of Women in Rhode Island, 2015: Highlights

Women in Rhode Island have made considerable advances in recent years but still face inequities that often prevent them from reaching their full potential. Since the 2004 *Status of Women in the States* report was published, the gender wage gap in Rhode Island has narrowed, a higher percentage of women have bachelor's degrees, and women are more likely to work in managerial or professional occupations. Yet, as in all other states, women in Rhode Island are less likely than men to be in the labor force and more likely to live in poverty. Women also continue to be underrepresented in the state legislature.

If current trends continue, women in Rhode Island will not see equal pay until the year 2049.*

Women hold **26.5**% of seats in the state legislature.

Key Findings

- Rhode Island's best grade is in the area of reproductive rights, for which
 it receives a B+. Its worst grade is in political participation, for which it
 gets a D+.
- Rhode Island women who work full-time, year-round earn 83 cents on the dollar compared with similarly employed men.
- Approximately 29.6 percent of those working in science, technology, engineering, and mathematics (STEM) fields in Rhode Island are women, compared with 28.8 percent nationwide.
- As of 2015, there is one woman of color in statewide elective executive office in Rhode Island, and no women of color from the state in the U.S. Congress.

Report Card Summo	ary
Political Participation	D+
Employment & Earnings	В
Work & Family	B-

Rhode Island

- Poverty & Opportunity C+
- Reproductive Rights B+
- Health & Well-Being C
- Women in Rhode Island who are unionized earn \$291 more per week, on average, than those who are not represented by a union.
- Approximately 32.0 percent of women in Rhode Island have a bachelor's degree or higher, an increase of about 8 percentage points since 2000.
- In 2012–2013, 18.4 percent of Rhode Island's four-year-olds were enrolled in state pre-K, preschool special education, or state and federal Head Start.
- Heart disease is the biggest killer of women in the United States. Rhode Island ranks 27 of 51 with a
 mortality rate of 131.3 per 100,000.

^{*}Equal pay projection is based on rate of progress between 1959 and 2013. See Appendix A2 of *The Status of Women in the States: 2015* for sources and methodology. Calculated by the Institute for Women's Policy Research.

Notes: See Appendices A1–A6 in *The Status of Women in the States*: 2015 for methodology and sources. Earnings are in 2013 dollars and compare 2000 Decennial Census data with 2013 American Community Survey data. Health insurance data are for 2013, prior to the full implementation of the Affordable Care Act. The regional rankings are of a maximum of six and refer to the states in New England region (Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont). n/a=not available. All indicators are defined so that a higher rate translates into higher rankings and letter grades. **Calculated by the Institute for Women's Policy Research.**

About the Status of Women in the States

The Status of Women in the States is an ongoing research project conducted by the Institute for Women's Policy Research (IWPR) to measure and track the status of women in all 50 states and the District of Columbia. IWPR appreciates the support of the Ford Foundation, the American Federation of Teachers, and the Women's Funding Network for the production of this fact sheet.

The Institute for Women's Policy Research (IWPR) conducts rigorous research and disseminates its findings to address the needs of women, promote public dialogue, and strengthen families, communities, and societies. The Institute's research strives to give voice to the needs of

women from diverse ethnic and racial backgrounds across the income spectrum and to ensure that their perspectives enter the public debate on ending discrimination and inequality, improving opportunity, and increasing economic security for women and families. The Institute works with policymakers, scholars, and public interest groups to design, execute, and disseminate research and to build a diverse network of individuals and organizations that conduct and use women-oriented policy research. IWPR's work is supported by foundation grants, government grants and contracts, donations from individuals, and contributions from organizations and corporations. IWPR is a 501(c)(3) tax-exempt organization that also works in affiliation with the women's studies and public policy and public administration programs at The George Washington University.
