

The Status of Women in Florida by County: Population \& Diversity

IWPR \#R474

Gina Chirillo, Julie Anderson, M.A., and Cynthia Hess, Ph.D.

## Introduction

Florida is the United States' fourth most populous state, with just under 19.4 million people in 2014 (Institute for Women's Policy Research 2016; Appendix Table II.1). Women make up a majority of its residents, totaling about 10 million of its inhabitants (Appendix Table II.1). Florida's geographic proximity to Central and South America and the Caribbean, its warm climate, and its generous tax policies (especially its lack of income tax, inheritance tax, and estate tax) shape its demographic character in particular ways: the state is more racially diverse and has larger proportions of immigrants, older women, and older men than the nation overall (Appendix Tables II.2, II.4, and II.5).

This briefing paper highlights demographic information relevant to the status of women in Florida. It explores differences between women and men on a range of variables, including age, race and ethnicity, marital status, household type, immigration status, geography, and veteran status. Data are analyzed by county (when available). These demographic data have important implications for determining investments to promote gender equality, and can be used to implement policies that address the needs of women in Florida's many communities.

## Ratio of Men to Women

Florida's overall gender ratio is 95.6 men of all ages for every 100 women, similar to the gender ratio of the United States as a whole ( 96.8 men for every 100 women; Appendix Table II.1). Approximately 51.1 percent of the state's residents are women, compared with 50.8 percent of the nation's total population.

- Florida's most populous county is Miami-Dade, with 2.6 million inhabitants (Appendix Table II.1). Its next most populous county is Broward County, which borders Miami-Dade County to the north. Its least populous county is Liberty, with approximately 8,300 residents.
- Leon County has the lowest ratio of men to women, with 90.6 men for every 100 women (Appendix Table II.1). This is likely due to the fact that Florida State University and Florida A\&M University (FAMU) are housed in this county, both of which have a higher population of female students than male students (Florida State University ND; Florida A\&M University 2015). Sarasota County has the next lowest ratio with 91.4 men for every 100 women, followed by Hernando, Flagler, and Pinellas Counties, which all have close to 92 men for every 100 women.
- Several Florida counties have significantly more men than women. Union County, which is one of the least populous counties in the state and is home to the Union Correctional Institution that houses only male prisoners, has an almost 2 to 1 ratio of men to women, with 10,064 male residents and 5,194 female residents (Florida Department of Corrections 2014; Appendix `Table II.1). Liberty, Hamilton, Lafayette, and Gulf counties also have larger proportions of men than women, with gender ratios of about three men for every two women.

## Racial and Ethnic Diversity

Southern states are more racially diverse than the country as a whole, and Florida is no exception (Anderson et al. 2016). In Florida, non-Hispanic White women make up 55.6 percent of the female population compared with 62.0 percent in the United States overall (Figure 1.1). Florida has a higher proportion of Hispanic women ( 23.8 percent) than the United States as a whole ( 16.9 percent), in part due to the large Hispanic population in Miami-Dade County, where 66.6 percent of women identify as Hispanic (Appendix Table II.2). The share of women in Florida who are Black is also larger than in the nation overall ( 15.8 percent in Florida compared with 12.8 percent in the United States), while the shares of Asian and Pacific Islander women, Native American women, and women who identify with another race or two or more races are slightly smaller in the state than in the United States (Figure 1.1).

Figure 1.1.
Distribution of Women of All Ages by Race/Ethnicity, Florida and United States, 2014

Notes: 2014 estimates are based on the 2010 Census.Racial categories are non-Hispanic. Distributions may not total to 100 percent due to rounding.
Source: IWPR analysis of data from the U.S. Census Bureau, Population Division accessed through American Fact Finder.
Over the last 20 years, the population of Hispanic women and girls in Florida has increased by 10.2 percentage points, while the percentage of women and girls who identify as non-Hispanic and White has decreased by 14.5 percentage points (Institute for Women's Policy Research 1998; Figure 1.1). The Black, Asian, and Native American female populations in Florida have stayed about the same (Institute for Women's Policy Research 1998).

- In about two-thirds of Florida's counties (46 of 67 counties), non-Hispanic White women constitute at least 65 percent of the population. The county with the highest proportion of White women is Holmes County ( 91.0 percent; Appendix Table II.2). In Miami-Dade County-the county with the lowest percentage of White women-only 14.0 percent of women identify as non-Hispanic and White (Appendix Table II.2).
- Gadsden County, which borders Georgia, has the highest proportion of Black women at 56.9 percent of the female population (Appendix Table II.2). The next highest proportion of Black women is in Madison County, also on the Georgia border ( 38.7 percent). Citrus County has the lowest percentage of Black women at 2.8 percent.
- Glades County, which is home to the Brighton Seminole Indian Reservation, has the largest proportion of Native American women at 5.3 percent (Appendix Table II.2; Seminole Tribe of Florida ND). In Miami-Dade County, only 0.1 percent of women are Native American.
- The proportion of the female population constituted by Asian and Pacific Islander women ranges from 5.7 percent in Alachua County (closely followed by Orange County at 5.6 percent) to 0.3 percent in Lafayette County (Appendix Table II.2).

## Immigrant Population and Countries of Origin

Florida's unique geographic position as the nation's state with the closest proximity to Central and South America and the Caribbean makes it a common destination for many immigrants from these regions. In 2014, 20.2 percent of the state's women and girls of all ages were immigrants, compared with 13.2 percent in the nation overall (Appendix Table II.4). Between 1990 and 2014, the immigrant population in Florida increased by 7.1 percent, while in the United States as a whole it increased by 5.3 percent (Institute for Women's Policy Research 1998).

In both Florida and the United States, the largest share of immigrant women comes from Latin American ( 74.5 percent in the state and 49.9 percent in the nation overall; Table 1.1). Approximately 1.6 million immigrant women and 1.4 million immigrant men, about three quarters of the state's immigrant population, were born in Latin America. Female immigrants from Asia make up just 11.0 percent of Florida's female immigrant population, while female immigrants from Europe make up 10.1 percent. Immigrant women from other areas total 4.3 percent of the immigrant population.

Most immigrants in Florida come from Cuba, where about 917,000 of Florida's residents were born (Table 1.2). Florida houses 78.2 percent of the United States' Cuban-born population. More than 300,000 Floridians are from Haiti, meaning that almost half of Haitian immigrants to the United States live in Florida ( 48.5 percent). While about 280,000 of Florida's residents are from Mexico, this represents just 2.4 percent of the United States' Mexican-born population. Notably, half of the United States’ Venezuelan immigrants ( 50.3 percent) and 43.0 percent of its Nicaraguan immigrants live in Florida. All of the top 10 sending countries to Florida are in Central America, South America, or the Caribbean with the exception of one: Canada. About 105,000 Canadians reside in Florida.

Table 1.1
Immigrant Population by Gender and Region of Birth, Florida and United States, 2014

|  | Florida |  |  |  | United States |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Women |  | Men |  | Women |  | Men |  |

- As Map 1.1 shows, immigrant women tend to live in the southern part of the state, while there are fewer immigrant women in the north and western areas of Florida .
- Miami-Dade County has the highest proportion of women and men who are immigrants at 53.2 and 49.8 percent, respectively (Appendix Table II.4). Broward County has the next highest percentage of immigrant women and men ( 33.5 percent and 30.0 percent), followed by Collier, Hendry, and Palm Beach Counties, where at least one fifth of female and male residents are immigrants. These counties, plus Monroe County, make up the entirety of the southern tip of Florida (Map 1.1).
- Baker County has the smallest share of immigrant women at 1.7 percent (Appendix Table II.4). In eight other counties-Columbia, Franklin, Gilchrist, Jackson, Levy, Nassau, Putnam, and Santa Rosa Counties-five percent of women or fewer are immigrants. All nine of these counties are in the northern part of the state (Map 1.1).
- The largest gender gap between the proportion of female and male immigrants is in Hendry County, where 29.6 percent of men and 20.4 percent of women are immigrants (Appendix Table II.4). In all but three counties (Hendry, DeSoto, and Hardee), the gender gap is less than five percent.

Table 1.2
Top Ten Sending Countries to Florida, 2014

|  | Florida |  | United States |  |
| :--- | ---: | ---: | ---: | ---: |
| Region | Number of <br> Immigrants | Share of Florida's <br> Immigrant <br> Population | Number of <br> Immigrants | Share of U.S.'s <br> Immigrant <br> Population |
| Cuba | 917,033 | $23.1 \%$ | $1,172,899$ | $2.8 \%$ |
| Haiti | 304,740 | $7.7 \%$ | 628,003 | $1.5 \%$ |

## Age

Florida's mild year-round climate and low tax burden (including the absence of state income tax, inheritance tax, and estate tax; Florida Department of Revenue ND; Florida Department of Revenue 2016) makes it a desirable destination for retirees. Among the 50 states and District of Columbia, Florida has the largest share of women and men aged 65 and older (19.7 percent for women and 16.6 percent for men; Hess et al. 2015; Appendix Table II.5). In the United States, 15.3 percent of women and 12.2 percent of men are aged 65 and older.

- Sumter County, which is home to the world's largest age-restricted retirement community (Rocco 2015), has the largest share of women aged 65 and older ( 50.5 percent) among Florida's counties (Appendix Table II.5). Sumter County also has the largest proportion of men over the age of 65 in Florida (47.0 percent).
- Charlotte County has the next largest proportion of older women and men (at 36.6 percent and 35.3 percent, respectively), followed by Citrus County (with 33.9 percent of women and 33.3 percent of men aged 65 and older), Highlands County ( 34.2 percent and 31.8 percent), and Sarasota County (33.9 percent and 31.0 percent).
- Leon County and Orange County, which are both home to large universities, have the lowest proportions of women aged 65 and older at 11.3 percent and 11.4 percent, respectively (Appendix Table II.5).
- In every county but one (Levy County), there is a larger proportion of women than men who are aged 65 and older (Appendix Table II.5). The largest gap between the proportion of older women and men is in Hamilton County, where 19.4 percent of women and 11.1 percent of men are aged 65 and older, a difference of 8.3 percentage points. Jackson, Lafayette, and Taylor Counties also have gaps that are more than eight percentage points.

## Marital Status

Florida's marital rates are similar to the rates in the United States as a whole. About 46 percent of women and 50 percent of men aged 15 and older in the state are married, compared with about 49 percent of women and 51 percent of men of this age range in the nation overall (Table 1.3). Florida has a slightly higher percentage of women and men who are widowed or divorced than the United States overall, and a slightly lower percentage of women and men who have never married.

Table 1.3
Distribution of Women and Men Aged 15 and Older by Marital Status, Florida and United States, 2014

|  | Florida |  | United States |  |
| :--- | ---: | ---: | ---: | ---: |
|  | Women | Men | Women | Men |
| Married | $46.3 \%$ | $50.3 \%$ | $48.5 \%$ | $51.2 \%$ |
| Widowed or Divorced | $25.5 \%$ | $14.5 \%$ | $21.3 \%$ | $12.3 \%$ |
| Never Married | $28.2 \%$ | $35.2 \%$ | $30.2 \%$ | $36.5 \%$ |
| Total Number, Aged 15 and Older | $\mathbf{8 , 5 3 1 , 2 9 6}$ | $\mathbf{8 , 0 1 3 , 5 3 3}$ | $\mathbf{1 3 2 , 1 0 5 , 7 4 7}$ | $\mathbf{1 2 5 , 6 6 4 , 9 2 3}$ |

Note: Married includes those whose spouse is absent (including separated couples) or present.
Source: IWPR analysis of data from U.S. Census Bureau, 2014 American Community Survey 1-Year Estimates accessed through American Fact Finder.

- The county in Florida with the highest marital rates for both women and men is Sumter County, at 65.7 percent and 65.0 percent, respectively (Appendix Table II.6).
- Several of Florida's counties have double digit gender gaps between the percentages of women and men who are married. In Union County, 53.2 percent of women are married compared with 32.3 percent of men, a gap of 20.9 percentage points (Appendix Table II.6). As mentioned above, this may be due to the fact that one of the largest prisons in Florida is located in Union County.
- Bradford County has the largest proportion of widowed or divorced women at 33.5 percent, followed by Hamilton ( 31.6 percent), Indian River ( 30.8 percent), Dixie ( 30.4 percent), and Pinellas Counties ( 30.4 percent; Appendix Table II.6). One quarter of men in Union County are widowed or divorced ( 25.4 percent), making it the county with the largest proportion widowed or divorced men in the state.
- In every county except one (Union County), there is a larger share of women who are widowed or divorced than men. The largest gender gap is in Indian River County, where 30.8 percent of women are widowed or divorced, compared with 14.8 percent of men, a gap of 16.1 percentage points.

## Household Status

Though Florida's demographic markers are unique in many ways, the makeup of its households-i.e. whether a woman or a man is the head of the household and whether or not these households have children under the age of 18 -is not largely different from the United States as a whole.

In Florida, 15.0 percent of households are headed by married couples with children under age 18, a slightly smaller proportion than the United States (18.9 percent; Table 1.4). Households headed by married couples without children in Florida make up 31.1 of households compared with 29.0 percent in the United States (Table 1.4). Single mothers of children under 18 make up 6.7 percent of Florida households, while single fathers comprise only 2.1 percent (Table 1.4). Florida's proportion of households headed by single women and men with and without children is similar to the United States as a whole (Table 1.4).

Table 1.4
Distribution of Households by Type, With and Without Children, Florida and United States, 2014

|  | Total | Married-couple family household |  | Female householder, no husband present, family household |  | Male householder, no wife present, family household |  | Nonfamily household |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | With Children | Without Children | With Children | Without Children | With Children | Without Children |  |
|  | Number | Percent | Percent | Percent | Percent | Percent | Percent | Percent |
| Florida | 7,328,046 | 15.0\% | 31.1\% | 6.7\% | 6.4\% | 2.1\% | 2.7\% | 36.0\% |
| United States | 117,259,427 | 18.9\% | 29.0\% | 7.0\% | 6.0\% | 2.3\% | 2.6\% | 34.2\% |

[^0]
## Same-Sex Partner Households

The Human Rights Campaign's State Equality Index names Florida as a state where it is a high priority to achieve basic equality in terms of sexual orientation and gender identity (Warbelow and Persad 2015). ${ }^{1}$ In 1997, the Florida legislature passed a Defense of Marriage Act to define marriage as a union between a man and a woman and to prohibit the recognition of same-sex marriages performed in other states (Boca Raton News 1977). In 2008, almost two-thirds of Florida voters approved a constitutional amendment to ban both same-sex marriage and civil unions in the state (Chapman 2011). Florida legally recognized same-sex marriage in January 2015 (Alvarez 2015), and its ban on same-sex marriage ended in June 2015 with the Obergefell v. Hodges Supreme Court decision, which stated that state-level bans on same-sex marriage are unconstitutional (Obergefell v. Hodges 2015).

Unlike the United States, Florida has more male than female same-sex households (almost 20,000 compared with about 17,000 ). The proportion of unmarried same-sex households in Florida is similar to the share in the United States as a whole, representing just half a percent of all households in Florida ( 0.5 percent). In the United States, there are more than 233,000 unmarried female same-sex households and almost unmarried 215,000 male same-sex households (Table 1.5). Together, these households represent 0.4 percent of all U.S. households.

Table 1.5
Number of Households by Partner Type, Florida and United States, 2014

| Total Number of Households | Florida | United States |
| :---: | ---: | ---: |
| Unmarried-partner households | $\mathbf{7 , 3 2 8 , 0 4 6}$ | $\mathbf{1 1 7 , 2 5 9 , 4 2 7}$ |
| Male householder and female partner | 474,220 | $7,175,477$ |
| Female householder and male partner | 228,342 | $3,432,899$ |
| Male householder and male partner | 208,871 | $3,294,307$ |
| Female householder and female partner | 19,994 | 214,664 |
| All Other Households | $6,853,826$ | $110,083,950$ |

Source: IWPR compilation of data from U.S. Census Bureau, 2014 American Community Survey 1-Year Estimates accessed through American Fact Finder.

## Veterans

In Florida, as in the United States overall, women are considerably less likely than men to be veterans. Less than two percent of women in the state ( 1.4 percent) and 17.7 percent of men are veterans, compared with 1.3 percent of women and 14.9 percent of men in the nation overall (Table 1.6). Florida's higher share of men who are veterans compared with the United States likely stems from the fact that the state is home to 20 major military institutions, including several Air Force bases and Naval sites (Florida Department of State 2010). In Florida, the percentage of women who are veterans is similar to the percentage the United States as a whole (Table 1.6).

[^1]Table 1.6
Number and Proportion of Veterans Aged 18 and Older by Gender, Florida and United States, 2014

|  | Women |  |  | Men |  |  |

| Florida | 8,180,142 | 113,593 | 1.4\% | 7,605,621 | 1,348,129 | 17.7\% |
| United States | 125,876,424 | 1,578,647 | 1.3\% | 118,422,236 | 17,681,070 | 14.9\% |

Source: IWPR analysis of data from U.S. Census Bureau, 2014 American Community Survey 1-Year Estimates accessed through American Fact Finder.

## Geography

Florida's most populated urban areas tend to be on the coastline, with Miami (Miami-Dade County) and Fort Lauderdale (Broward County) on the southeast coast and Tampa and St. Petersburgh (Hillsborough County) on the southwest coast. Florida has a larger proportion of women and men who live in urban areas than the United States as a whole (Table 1.7). In fact, 92.6 percent of women and 91.7 percent of men in Florida live in urban areas in the state. In the United States, 78.6 percent of women and 78.0 percent of men live in urban areas.

Table 1.7
Proportion of Population Living in an Urban Area by Gender, Florida and United States, 2014

|  |  |  |  |  |
| :--- | ---: | ---: | ---: | ---: |
|  | Total Population |  | Proportion Living in Urban Area |  |
| County | Women | Men | Women | Men |
| Florida | $10,168,487$ | $9,724,810$ | $92.6 \%$ | $91.7 \%$ |
| United States | $161,968,654$ | $156,888,402$ | $78.6 \%$ | $78.0 \%$ |

Note: All ages. Urban areas are those that are defined in the American Community Survey as "Metropolitan Statistical Areas," which have at least one urbanized area that has a population of at least 50,000, and is comprised of the central county or counties or equivalent entities containing the core, plus adjacent outlying counties having a high degree of social and economic integration with the central county or counties as measured through commuting.
Source: IWPR analysis of American Community Survey microdata (Integrated Public Use Microdata Series, Version 6.0).

## Conclusion

Demographic data present an image of a state's population that can provide insight into the needs of women and girls and policy changes that would improve their status. For example, Florida is more racially and ethnically diverse than the United States as a whole and has a large and growing population of immigrants, which has specific implications for advocates, philanthropists, and policymakers. It is essential that women of color and immigrant women in Florida-both populations that have, on average, lower incomes and higher poverty rates-have adequate access to education, health care, employment, and other services. Florida also has an older population than the United States as a whole, making it crucial for policymakers and advocates to focus on changes such as improving the availability and affordability of elder health care and protecting Social Security benefits to help ensure the economic security of older Floridians. Understanding the characteristics of Florida's women and girls is a foundation to contextualize their status in specific areas, and can help illuminate specific populations’ challenges that may require support.

## Appendix I:

## Methodology

To analyze the status of women in Florida by county, IWPR selected demographic indicators that prior research and experience have shown illuminate issues that are integral to women's lives and that allow for comparisons with other states and the United States as a whole. The data in IWPR's Status of Women in Florida by County: Population \& Diversity briefing paper are IWPR analysis of the U.S. Census Bureau's American Community Survey (ACS), accessed through American Fact Finder or from the Minnesota Population Center's Integrated Public Use Microdata Series, Version 6.0 (Ruggles et al. 2015).

The tables and figures present data for individuals or households, often disaggregated by race and ethnicity. In general, race and ethnicity are self-identified; the person providing the information determines the group to which he or she (and other household members) belongs. People who identify as Hispanic or Latino may be of any race; to prevent double counting, IWPR's analysis separates Hispanics from racial categories-including White, Black (which includes those who identified as Black or African American), Asian/Pacific Islander (which includes those who identified as Chinese, Japanese, and Other Asian or Pacific Islander), or Native American (which includes those who identified as American Indian or Alaska Native).

County-level data, accessed through American Fact Finder, combine five years of data (2010-2014) to ensure an adequate sample size. Margins of error were used to determine if the coefficient of variance (CV) for the data met the minimum threshold of 25 percent; if the CV was greater than 25 percent, the data are not presented. When analyzing state- and national-level ACS microdata, IWPR used 2014 data, the most recent available. Data are not presented if the average cell size for the category total is less than 35.

IWPR's analysis of ACS microdata used personal weights to obtain nationally representative statistics for person-level analyses and household weights for household-level analyses. Weights included with the IPUMS ACS for person-level data adjust for the mixed geographic sampling rates, nonresponses, and individual sampling probabilities. Estimates from IPUMS ACS samples may not be consistent with summary table ACS estimates available from the U.S. Census Bureau due to the additional sampling error and the fact that over time, the Census Bureau changes the definitions and classifications for some variables. The IPUMS project provides harmonized data to maximize comparability over time; updates and corrections to the microdata released by the Census Bureau and IPUMS may result in minor variation in future analyses.

Appendix II:

## Population \& Diversity Tables

Appendix Table II.1.
Number of Women and Men of All Ages, Florida Counties, State, and United States, 2010-2014

| County | Women | Men | Sex ratio (men per 100 women) | County | Women | Men | Sex ratio (men per 100 women) |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Alachua | 130,019 | 121,740 | 93.6 | Leon | 147,395 | 133,487 | 90.6 |

## About the Status of Women in the States

status of women The Status of Women in the States is an ongoing research project conducted by IN THE STATES the Institute for Women's Policy Research to measure and track the status of women in all 50 states and the District of Columbia. IWPR's Status of Women in the States reports have helped state and local partners educate the public on issues related to women's well-being, inform policies and programs, make the case for establishing commissions for women, establish investment priorities, and inspire community efforts to strengthen area economies by increasing the participation of women and improving women's status.

## About Florida Women's Funding Alliance

Florida Women's Funding Alliance (FWFA), an affinity group of Florida Philanthropic Network (FPN), envisions a Florida where women and girls thrive. The FWFA mission is to transform the lives of women and girls through members' collective voices and resources. FWFA offers FPN members an opportunity to interact and connect with other staff and board members of foundations and other grantmaking organizations working to transform the lives of women and girls in Florida.
https://www.fpnetwork.org/fwfa

## About Florida Philanthropic Network

Florida Philanthropic Network is a statewide membership network of nearly 120 philanthropic organizations working to build philanthropy to build a better Florida. FPN's members are private independent, corporate and family foundations, community foundations, public charity grantmakers and corporate giving programs - from Miami to Jacksonville; Naples to Pensacola - who hold over \$6.5 billion in assets and invest over $\$ 435$ million annually (excluding members located outside Florida) to improve the quality of life for our citizens. FPN members share a commitment to promoting philanthropy, fostering collaboration and advancing public policy by Florida, in Florida.
https://www.fpnetwork.org/
This briefing paper, funded by Florida Women's Funding Alliance, an Affinity Group of Florida Philanthropic Network, is based on IWPR's national Status of Women in the States project supported by the Ford Foundation, the American Federation of Teachers, and the Women's Funding Network.

## For more information on IWPR reports or membership, please

The Institute for Women's Policy Research conducts and communicates research to inspire public dialogue, shape policy, and improve the lives and opportunities of women of diverse backgrounds, circumstances, and experiences. IWPR is a 501 (c)(3) tax-exempt organization that also works in affiliation with the women's studies and public policy and public administration programs at The George Washington University.IWPR's work is supported by foundation grants, government grants and contracts, donations from individuals, and contributions from organizations and corporations. IWPR is a 501(c)(3) tax-exempt organization that also works in affiliation with the women's studies and public policy and public administration programs at The George Washington University.

[^0]:    Notes: Households with children include own children under age 18.
    Source: U.S. Census Bureau, 2014 American Community Survey 1-Year Estimates

[^1]:    ${ }^{1}$ The equality index is based on statewide laws and policies addressing harassment/bullying of students, transgender healthcare, and prohibiting discrimination based on sexual orientation and gender identity in the following areas: housing, employment, public accomodations, and schools.
